Global Millennium Prize and Millennium Awards

Statement by the director of the Millennium Project:

Congratulations to all the winners, the judges, the sponsors, and Concepción Olavarrieta with her Millennium Project Node in Mexico.

These prizes are part of a new human awaking around the world. We are wakening to the realization that anyone can contribute their ideas to improve people's lives. For the first time in history it is possible to connect people with good ideas with people who need them, and connect to the resources that can implement the ideas that can improve the human condition anywhere in the world.

The 15 Global Challenges have been identified and updated by over 2000 participants in the Millennium Project. And now you too are part of this international participation.

The Millennium Project will join forces with the World Federation of United Nations Associations to expand the participation in the Global Millennium Prize. I hope that the winners over years in the future will form a network for connecting people, ideas, and resources to build a better future.

In addition to the Global Millennium Prize for secondary school students, we are also planning to have a prize for university students around the world. Maybe one day we can connect the many prize programs around the world into a global system that can help connect people, ideas, and resources that will answer all the 15 Global Challenges.

Futuristically yours,

Jerome C. Glenn, director
The Millennium Project
