

*You are invited to join
The Millennium Project Executive Director Jerome C. Glenn
For the North America launch of the
2009 State of the Future*

The internationally acclaimed *State of the Future* report - on which is based The Tech Awards, a renowned signature program of The Tech Museum - focuses on 15 global challenges facing humanity and offers a framework for solutions.

The exclusive unveiling in Silicon Valley will offer a preview of the next global economy, science and technology innovations and strategic planning for the future. Similar *State of the Future* events are planned around the world in the coming months.

WHO: Jerome C. Glenn, Executive Director of leading global futures think tank and co-author of the *2009 State of the Future*. The highly respected futurist co-founded The Millennium Project in 1996. A renowned expert worldwide, Glenn has over 35 years experience working with governments, private industry, UN organizations, universities, and NGOs.

Paul Saffo, Technology Forecaster and Consulting Professor at Stanford University and Singularity University.

Salim Ismail, Executive Director for Singularity University.

WHEN: Tuesday, August 4th 10 a.m. –11:30 a.m.

WHERE: Singularity University, NASA Ames Research Center, Bldg #943, Moffett Field, CA.

RSVP: Karen Aiken at mailto:karen_aiken@mac.com or call 408-234-9054

About The Millennium Project

The Millennium Project is a global, independent futures research think tank that provides early alert and analysis of long-range issues, opportunities, challenges and strategies for policy making, advanced training and public education. Consisting of top futurists, scholars, business planners, and policy makers who work for international organizations, governments, corporations, NGOs, and universities, The Millennium Project manages a coherent and cumulative process that collects and assesses analysis from its several hundred international participants to produce highly

respected futures publications. Among these are the annual "State of the Future <<http://www.millennium-project.org/millennium/issues.html>> ", "Futures Research Methodology <<http://www.millennium-project.org/millennium/FRM-v2.html>> " series, and various special studies, such as the State of the Future Index <<http://www.millennium-project.org/millennium/SOFI.html>> . Established 13 years ago under the auspices of the UN University and later the World Federation of United Nations Associations, the Millennium Project has since then built an independent, credible and respected reputation around the world for continuously updating and advancing humanity's thinking about the future.
