

"Professor Jin's new book, *Global Technological Change: From Hard Technology to Soft Technology*, is a powerful re-conceptualization of technological options and innovation management, which can help steer societies in assessing technologies for the 21st century. As Zhouying Jin correctly points out: in emerging knowledge societies, the "soft" technologies are drivers of physical "hard-ware" technologies. These soft technologies include management, organizational design, education for creativity and entrepreneurship, good governance, prudent regulation, patent systems, efficient banking as well as fostering systems thinking, ecological and cultural balance. This book is a major intellectual advance that can help clarify human choices for decades to come."

Hazel Henderson, MD, Calvert-Henderson Quality of Life Indicators.

"This book is the most thoroughly comprehensive look at technology from a Western and Chinese perspective that I have ever had the privilege to read. The sweep of Prof. Jin's examination is matched by the breadth of her scholarship. Her development of "Soft Technology" as a concept which can bridge the divide between our planetary science and our cultural consciousness is a unique contribution to our understanding of the place where science meets awareness. Her work deserves to be studied in careful detail for the insight it might provide us, particularly in the West, of how to appropriately empower Eastern cultures to be fully equal global partners with the Western Industrial communities based upon Harmony, Balance and Equality."

Rinaldo S. Brutoco, President, World Business Academy

"This volume indicates that the complex problems we are facing in the 21st century can only be solved by a balance between 'yin-yang' environment, between the hard technology (machine-centred) and the soft technology (human-centred). This concept is invaluable as it conveys a new perspective of the assumptions about the relationships between technological innovation, institutional innovation, as well as of the gap between the developed and developing countries at the turn of the new millennium."

Karamjit S Gill, Editor, AI& Society: Journal of Human-Centred Systems

Zhouying JIN is a senior researcher and professor, Institute of Quanti-Economics & Techno-Economics of Chinese Academy of Social Sciences; Director, Center for Technology Innovation and Strategy Studies (CTISS) of Chinese Academy of Social Sciences. She also is president and founder for the Beijing Academy of Soft Technology.

### **Short List of Contents**

<i>Preface to the English Edition: Theodore Gordon</i> .....	<i>x</i>
<i>Acknowledgements</i> .....	<i>xiii</i>
<i>Detailed Table of Contents</i> .....	<i>xv</i>
<i>Introduction</i> .....	<i>xxi</i>
Chapter One: .....The Evolution of Technology .....	1
Chapter Two: .....Historical Antecedents of Soft Technology .....	41
Chapter Three: .....The Characteristics and Classifications of Soft Technology .....	111
Chapter Four: .....Soft Technology and Innovation.....	141
Chapter Five:.....Soft-Tech Industries—Industrial Innovation of Soft Technology .....	199
Chapter Six: .....What is Technological Competitiveness?.....	241
Chapter Seven: .....Soft-Tech Talents and the Education Revolution .....	271
Chapter Eight: .....Soft Technology and the Fourth Generation of Technology Foresight .....	277
Postscript:.....The Principles for Development in the Twenty-first Century .....	297
Appendix:.....Organizational Innovation and Virtual Research Institutes .....	303
<i>Bibliography</i> .....	<i>325</i>
<i>About The Author</i> .....	<i>333</i>
<i>Back Cover: Hazel Henderson Rinaldo S. Brutoco and Karamjit S Gill</i> .....	<i>335</i>
