WALLONIA POLICY LAB

A new headquarter in the heart of Namur

Main changes

1. Relocation of our premises to the former Parliament of Wallonia registry.
2. Development of the Wallonia Policy Lab, (on the model of the *European Policy Lab*) in order to reinforce the operationality of our Foresight work
3. Creation of our own executive certificate in operational Foresight (120 hours), each Monday afternoon September to June
3. Reinforcement of the convention with the Government of Wallonia in our function of Independant Regional Foresight Unit (CIPré) orientated toward the society
4. New transborders initiatives with France, Germany, Luxemburg, etc.
5. Foresight work in the framework of the 2030 European Territorial Agenda
6. Cooperation with the National Engeneering School of the University of Tunis (Jejel Ezzine) for Foresight and Roadmaps in Master Resaerch in Science, Technology & Innovation Policy

Institut Destrée, Congrès Bifurcations, Namur, 04.12.2018.

Pascale, Head of the Policy Lab & the Foresight Unit

Institut Destrée
THE WALLONIA POLICY LAB

L'Institut Destrée c'est :

- Une recherche valorisée, un développement permanent, le conseil sur le terrain
- Une consolidation par la formation
- Une ouverture nouvelle aux publics, les entreprises
- Une présence internationale

The Wallonia Policy Lab

Policy-making paths for our regions and companies

What does the Wallonia Policy Lab have to offer?

How do I anticipate industrial, digital and sustainability challenges?

How do I design a policy or a program?

How do I coordinate multiple public administrations, regional stakeholders, organisations and companies around a collective project?

How do I involve stakeholders in a common project?

How do I assess the medium-term and long-term effects of a legislative initiative?

How do I recognise and overcome obstacles or reluctance towards a policy?

How do I prepare my organisation for change?

Key projects (1)

Union wallonne des Entreprises (Wallonia Federation of Companies): methodological support and facilitation for the *Odyssée 2068* (2018-2021) foresight initiative

Government of Wallonia: activating and monitoring the Wallonia Foresight Mission 22; analysing global macro-trends and challenges for Wallonia (2020-2021)

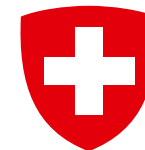

Wallonia Territorial Intelligence Platform, in partnership with the Territorial Development Department of the Wallonia Public Service: contributed to sustainable and attractive development of the region; investigated new, multilevel, governance practices

Province of Walloon Brabant, Department of Territorial Development: economic development scenarios (2018-2020)

Government of Luxembourg, Ministry of Sustainable Development and Territorial Development: supported the creation of the foresight vision and implemented the operational strategy for the territorial development scheme for the Greater Region (2018-2020)

Bundesamt für Statistik – Swiss Federal Office for Statistics, Neuchâtel: *Foresight studies: foundations, scenarios, models and data* (2018)

Key projects (2)

Regional Development Agency IDEA (Cœur du Hainaut): momentum foresight exercise with stakeholders and preparation of impact prior analysis as part of the FEDER programme 2021-2027 (2020-2021)

NGO SOS Faim: foresight exercise on international cooperation in agriculture and food systems for 2060

Public Service of Wallonia: supported two DGO5 departments (Local Authorities and Social Action), co-constructed a vision for 2040 and some strategic priorities for achieving it in order to prepare the future multi-annual administration contract (2017)

Parliament of Wallonia: *support for the foresight citizen panel «Investing in our Youth»*; assisted with the qualitative audiovisual survey and the selection of citizens, and moderated the panel for a consensus conference (2017-2019)

The Policy Lab Team in 2021

Pascale Van Doren is Deputy Director General of The Destree Institute and agronomist. A graduate of the Louvain School of Management, she is head of the Independent Regional Foresight Unit and the Wallonia Policy Lab. She has managed a number of research projects and regional, territorial and organisational foresight projects at regional and European levels.

Didier Paquot is a research director and Chief Economist of The Destree Institute. A graduate of the University of Liege, he is also a certified operational foresight practitioner. He is an expert in regional and industrial economics, innovation and R&D ecosystems, the labour market, and the relationships between the private and the public sector.

Sarah Bodart is an analyst and economist, a graduate of Maastricht University, and a certified operational foresight practitioner. Specialising in economic development, she has been involved in several impact assessment and research projects on development policies at regional, European and international levels.

Fabien Moustard has two Master's degrees, the first in natural science from Paris 6, and the second in social and political science from UCLouvain. He is currently doing a PhD at University College London. He is an expert in complex systems analysis and is a certified foresight practitioner.

Philippe Destatte is the Director General of The Destree Institute. He is a historian and futurist who specialises in governance, transition and industrial foresight. He teaches at the Economics and Law faculties at the Universities of Mons, Paris Diderot and Reims.

Annabelle Bietheres is an analyst, graduate in International Cooperation, Namur University College (HEPN) Department of Economics & Management, and certified in Operational Foresight (The Destree Institute).

Prior Impact analysis

24 hours Hackathon at the Parliament of Wallonia

The image features a vibrant, abstract background with a mix of pink, purple, blue, and yellow watercolor-like washes. Overlaid on this is a complex, dense network of thick, black, hand-drawn scribbles that form a roughly rectangular frame. In the center of this frame is a solid light green circle. Inside this circle, the text "Foresight Mission Wallonia 22" is written in a bold, purple, sans-serif font, arranged in three lines.

**Foresight
Mission
Wallonia 22**

Ten Global Trends of the FMW22

Ten Global Trends of the FMW22

1. The sustainability of natural resources: ecological transition and territories in transition
2. Agriculture and food on the international scene: towards which evolutionary models that are sustainable for humans
3. The future of governments: towards new governance and contractualisation
4. The future evolution of the perimeter of the State: its relations with the competitive sphere
5. The European Union: still progressing but still on a razor's edge
6. The artificial intelligence paradigm: measuring its developments and challenges
7. The evolution of skills and professions and those who will come tomorrow
8. The growing integration, at the global level, of foresight and anticipation in ways of thinking and education
9. Changes in security needs, between new alliances and asymmetric wars
10. Gender cohesion

Mission prospective Wallonie 22 (MPW22) – objectifs 2021

1. Analyse the potential effects for Wallonia of the ten major trends identified in 2020
2. This analysis is done on the basis of as many stakeholder seminars - face-to-face or remotely depending on the evolution of the pandemic.
3. Generate a report on each issue, at the latest one month after each seminar.

Work process

For each global trend:

1. Presentation of the trend in an internal seminar composed of the Prospective Unit extended to the 8 members of the Executive Certificate (update and Powerpoint of the trend);
2. Systemic analysis of the problem, identification of actors and factors, global, European, federal, regional;
3. Analysis of the evolution of each system, seen as a subsystem of a more global system by 2100;
4. Identification of the challenges of each system by scenarios;
5. Launch of external stakeholder seminars based on these issues;
6. Drafting of reports by seminar.
