

SERBIA NODE REPORT

During the previous year, there was a reorganization of the Belgrade Node in accordance with the latest activities within the Millennium Project.

Based on the SDG initiatives and the UN Action Plan 2030, the initial activity and greatest attention was devoted to preparations for the realization of the "Africa eLearning eHealth Satellite Project" - AeLeHSP.

During 2024 and 2025, the Belgrade Node was expanded with new members, whose main domain of interest is AI, in accordance with the initiatives launched in Serbia and the proclaimed policy of the Millennium Project.

In this sense, the status of Co-chair membership was also established, with the aim of more effective inclusion in the international flow of regulations for the introduction and application of the sensitive AGI area.

We are convinced that the actions of the Belgrade Node will intensify in the coming period, as well as in the entire SEE region.

Tihomir Divjak

Belgrade Node Co-chair
