

REPORT ON THE ACTIVITIES OF THE SERBIA BELGRADE NODE IN 2025

Node leadership:

Mr. Tihomir Divjak, Chair

Mr. Milan Antonijević, Co-chair

In the previous year, the Belgrade node expanded its membership with new members:

Mr. Milan Antonijević (Milan@antonijevic.eu)

Mrs. Ivana Kostić (vanja.kaselano@gmail.com)

Mr. Miloš Jovanović (milos@wecan.rs)

who are very important, renowned visionaries and foresighters.

During the year, the membership of the Serbia node was directly involved in actions related to AI and AGI initiatives in accordance with the general strategy of the Millennium Project, both locally and internationally.

Significantly, the international conference "Future & AI" organized by WE CAN was successfully held in Belgrade in June 2025, dedicated to the future and development in the field of education, health, and business using AI, as well as the need to establish a world system of regulation and control in the field of AI and AGI.

A new special system for eLearning, "Kampster AI", a model of AI-guided online learning, was successfully presented at the conference.

Among the lecturers and panelists representing the Millennium Project at the conference was Mr. Ibon Zugasti.

It is expected that the next Future & AI 2026 conference will take place this year as a continuation.

It is necessary to note that the new members of the Belgrade node have achieved excellent synergy and cooperation, bringing new energy to prepare for the implementation of the AeLeHSP pilot project in Africa in 2026.

Individual members actively participated in the work of many European conferences, as well as at the Dubai Future Forum and the Ljubljana Forum.

An action was launched for more significant cooperation between MP nodes in the SEE region soon.

Belgrade, 03.02.2026

Tihomir Divjak
